10      1      **PRIODOOR EVX – EI 30**  
**Fire protection barrier, Surface-Mounted**

Universally usable fire protection barrier with installation frame for easy wall installation. The fire protection barrier is ideally suited for the small-surface to large-scale bulkheading of in-wall and panel distributors in rescue routes. The closure is smoke-proof and offers fire resistance for 30 minutes.

**Function**

- 30 minutes fire resistance, fire retardant
- EI 30/F 30; classification
- Smoke protection
- Protection rating according to IP 42
- Safety class II

**Construction**

- Fire-protection barrier for full-surface wall installation
- With circumferential, pre-drilled mounting frame,
- 22 mm material thickness, 115 mm wide
- Mounting on solid wall
- 2-point door locking device with turning lever and single cylinder,
- can be integrated into the building locking system
- Single leaf door with stop position DIN right
- Double-leaf design up to H x W 2500 mm x 2300 mm
- Circumferential smoke and fire seals, automatically expand in the event of a fire
- Mounting directly on the wall with pre-drilled holes in mounting frame
- Door leaf easy to hinge and unhinge

**Material characteristic**

- Building material with surface coating non-combustible, classification A2 – s1, d0
- Standard CPL surface is highly chemically resistant and sensitive to moisture
- Colour light grey, similar to RAL 7035, edges and bevels in different colour

**Scope of delivery**

- PRIODOOR EVX with mounting frame
- Mounting hardware for solid wall

**Options**

- All PRIORIT surfaces
- Mounting frame for additional battens
- Artificial ventilation
