PRIOCAB-Li Typ90
Safety cabinet for the storage of lithium-ion batteries

Fire-resistant safety cabinet Type90 in two sizes: single-leaf cabinet with hydraulic door closer and a double-leaf cabinet with free-running doors including door closing mechanism. Suitable for storing lithium-ion batteries. The cabinets have exceptionally high stability and durability. The base material is highly compressed, non-absorbent and does not present a fire load. The floor-standing cabinets are equipped with a base that can be moved underneath as standard and can optionally be aligned with height-adjustable feet.

Function

- Fire resistance rating (FWF) 90 minutes
- Safety cabinet type 90 according to EN 14470-1
- Suitable for the storage of batteries

Construction

- Housing with high mechanical resistance
- Housing made of noncombustible material including the decorative surface
- Individual colour design
- Single-leaf cabinet with hydraulic door closer, 90° hold-open, closure in case of fire
- Two-leaf cabinets with free-moving doors: thermally induced closure in case of fire
- Air supply and ventilation openings in the top of the cabinet are self-closing in case of fire, DN 100 mm connections
- Three height-adjustable pull-out trays, weight capacity 75 kg, hole spacing 32 mm
- Bottom tray with perforated sheet metal insert
- Accessible plinth (e.g. fork-lift forks), height 100 mm with removable plinth cover panel
- Integrated, height-adjustable feed for levelling out unevenness in the floor

Material characteristic

- Standard surface CPL
- Non-combustible panel with surface coating, classified A2 - s1, d0
- Standard surface light grey, similar to RAL 7035

Optionen

- Doors or entire corpus in alternative RAL colours / surfaces, on request.
- Fire-resistant cable bulkhead
- Additional tray bottom
- Single cable and pipe lead-through
- Smoke detector
- Exhaust air attachment
