10 1 **PRIOCAB Typ90**
Under-table pull-out units for safe storage of lithium-ion batteries

Type90 flame-resistant under-table safety cabinet with a front panel. Suitable for the approved storage of lithium-ion batteries. The under-table pull-out cabinets feature extraordinary stability and durability. The basic material is highly compacted, non-absorbent, and doesn't represent a thermal load. The cabinets can be aligned by default with height-adjustable feet.

Function

- Fire resistance 90 minutes
- Suitable for the storage of lithium-ion batteries

Construction & Equipment

- Housing with high mechanical resistance
- Housing made of noncombustible material including the decorative surface
- Self-closing air supply and ventilation openings in case of fire
- Smooth and easy-moving drawer with hold-open function, self-closing in case of fire
- Integrated pipe and cable penetration
- Air supply and ventilation openings at the rear
- Lockable with cylinder lock, including lock status indicator
- The cabinet is equipped with castors for easy movement on site

Material & Surface

- Standard surface CP laminate is chemically highly stable and moisture-resistant
- Non-combustible board with surface coating, classification A2 – s1, d0
- Surface light grey, similar to RAL 7035

Options

- Other sizes on request
- Individual colour design

Version

- Under-table safety cabinet with one pull-out
