10 1 **PRIOCOVER**
Mobile fire protection cover

Universally usable slip-on housing for comprehensive fire protection for active or passive storage of Lithium-ion batteries. The bottom opened case is provided with stable corner angles. The crane eyes allow easy transport and easy insertion. It is also possible to put the batteries over the case even if the fire starts. The fire protection cover has a fire resistance of 90 minutes.

Function

- Non-combustible incl. decorative surface, A2-s1,d0
- Fire resistant construction - Fire resistance 90 minutes
- Pressure Stable
- Mechanical pressure relief
- Expert opinion of an accredited material testing institute
- Suitable for passive and active storage

User-friendly

- Easy handling
- Mobile, simple solution
- No time consuming putting the batteries in
- Safety cabinets
- Easy to put over loaded pallets
- Quick insertion by means of forklift truck
- Easy transport by means of crane eyes
- Corner angle edge protection
- Space-saving, stackable
- Standard size to cover a Euro pallet 1200 x 800
- Covering of pallets, sump trays or mesh boxes
- Placement directly on existing floor

Robust and durable

- Solid construction
- Edge and corner protection
- High stability
- High surface hardness
- High chemical resistance
- Scratch-resistant
- Stain resistant
- Single layer wall construction - wall thickness 42 mm

Sustainability

- Recyclable
- Building material has Green Building Declaration according to LEED and DGNB
- Pollutant-free

Material property

- Non-combustible board with surface coating, classified A2 – s1, d0
- Standard surface CPL
- Standard colour light grey, similar to RAL 7035
