10 1 **PRIOROOM GAS**
Fire-resistant safety cell
Special solution for gas cylinder storage

Compact, fire-resistant safety cell for safe storage of gas cylinders. The safety cell can be constructed quickly and cleanly in custom dimensions made of pre-fabricated elements that are just 42 mm in thickness, in consideration of the existing building structures. It offers a fire resistance of 90 minutes.

A steel cylinder truck can be used to drive into the safety cell on ground level or via an approach ramp.

The homogeneous, solid material has high-quality, easy to clean interior and exterior surfaces.

The safety cell has undergone an expert assessment by an accredited materials testing institute, and offers certified quality. It is an alternative to commonly available gas cylinder cabinets.

Function

- Fire resistance 90 minutes: fire resistant
- Expert opinion by an official material testing institute

Construction & Equipment

- High mechanical resistance
- Barrier-free entry with transport equipment possible
- Door(s) with 3D stainless steel strips, 3-point locking system, prepared for profile cylinder
- Suitable for the storage of compressed gas cylinders
- Ventilation openings on the top side, DN 100 - closure via fire dampers

Material & Surface

- Building material with surface coating on both sides, classified A2 – s1, d0 non-combustible
- Standard surface CP laminate
- Colour light grey, similar to RAL 7035

Options

- Doors or entire body in alternative RAL colours / surfaces
- Fire resistant cable compartment
- Barrier-free access on request
- Ventilaton flap
- Base with toeboard

Fire-resistant gas cylinder walk-in storage units, 1-leaf

- GFR91:600 for 2 x 50 litres / 3 x 10 litres gas cylinder
- GFR91:800 for 3 x 50 litres / 5 x 10 litres gas cylinder

Fire-resistant gas cylinder walk-in storage units, 2-leaf

- GFR92:1200 for 4 x 50 litres / 7 x 10 litres gas cylinder
- GFR92:1400 for 4 x 50 litres / 8 x 10 litres gas cylinder
