# PRIOLEC EK

## Electro Terminal Box without Equipment

Fire protection electro terminal box as empty housing for mounting on wall for the installation of hardware and safety fuses.

Proof of functional integrity must be provided in accordance with MLAR.

### Function

- 30/90 minutes fire resistance, fire retardant/fire resistant
- Classification: Suitable for maintenance of performance for 30/90 minutes

■ Example of installation

■ Cable penetration seal

■ Construction

## Construction

- Cabinet with high mechanical resistance for surface mounting
- Mounting via four holes in the frame corners
- Cover with recessed grip and bolted down with two self-locking nuts
- Demountable frame plate system for easy cable entry
- Cables can be inserted from two opposite sides
- Cable penetration seals automatically expand in the event of a fire
- Simple mounting of installations via pre-drilled holes

## Material characteristic

- Non-combustible board with surface coating, classified A2 – s1, d0
- Surface CP laminate
- Colour light grey, similar to RAL 7035, edges and bevels in different colour

## Installation

Easy installation and cable management via demountable frame plate system in sandwich architecture
