10 1 **PRIODOOR NK TUN**
Emergency telephone box door

Emergency phone boxes made of concrete elements provided by the customer. Designed according to Directive 2004/54/EG, RABT, ZTV-ING Part 5 and TL/TP TTT. The design considers the special requirements for technical equipment used in the operation of road tunnels, and is suitable as a fire protection closure for the maintenance of performance of electrical security systems.

Function

- Fire resistance 90 minutes: fire-resistant
- T 90-RS classification
- Smoke-tight and tested for continuous operation
- Protection rating in accordance with IP 54
- Stable against pressure / suction up to 1000 Pa
- Safety class I

Construction

- Single-leaf fire-resisting closure with block frame
- Solid door leaf with stainless steel surface on the outside
- F 90 glass up to max. 45% of the door area
- Adjustable stainless steel hinges and multiple bolt lock
- Self-closing door with cushioned pinion door closers
- EN-standard door handle set in stainless steel
- Identification with pictograms according to RABT
- Monitorable door status by inductive proximity switch, 90° rotatable
- Equipotential bonding

Material characteristic

- Building material A2 – s1, d0 non-combustible
- Building material is chemically highly stable, solid, stable and moisture-resistant
- Surface on one side (outside) in stainless steel 1.4571, material characteristic according to ZTV-ING Part 5, requirement class I,
- Surface on the hinge side powder coated, RAL 2009 Traffic Orange
- Strike plates in stainless steel 1.4571

Lieferumfang

- Door PRIODOOR NK TUN
- Installation Instruction

Optionen

- Special sizes on request
